ABOUT US

Trelawny is an independent manufacturer of pneumatic tools and surface preparation equipment operating from its headquarters in the engineering heart of the UK in Leamington Spa. For over 60 years Trelawny has been offering a range of equipment for the preparation of concrete, steel and stone in industries which include:

- Construction
- Marine and offshore (oil and gas)
- Floor preparation
- Nuclear decommissioning (remediation)
- Utility contracting
- Restoration, refurbishment and demolition

Our products are sold worldwide through a global network of quality approved stockists and distributors.

Our aim is to continue to develop our product offering to satisfy the demand and needs of our customers. With this, we continually seek quality stockists and distributors worldwide who are interested to work with a reputable growing brand and offer the service, back up and know-how our customers require.

ABOUT THE SAFETY RANGE

Trelawny SPT Ltd have been involved in the design, manufacture & distribution of surface preparation & deck maintenance equipment for more than 60 years. We offer packages of tools for complete deck maintenance to small area patching & refurbishment.

The latest technologies of low vibration (Vibro-Lo™), reduced sparking tools & dust free working (TVS) are offered to ensure our customers can perform to the highest standards.

With the increase of the gas carrying market, particularly LPG (liquefied petroleum gas) + LNG (Liquefied natural gas) carriers and the offshore market, there is a rising demand for products which can be used in potentially explosive areas.

Trelawny's range of safety tools include:

Ex Needle Scalers:
Our range of ATEX
Needle Scalers are
suitable for coating and
corrosion removal in
gas zone 1.

Ex Vacuums:
As part of our TVS
range Trelawny supply
a full range of vacuums
for wet and dry use.
Including type H and
ATEX models.

Reduced Sparking
Attachments:
All of the Trelawny
standard range of
Scaling tools can be
fitted with reduced
sparking attachments.

TVS Packages: Our TVS packages include a range of surface preparation tools complete with integrated dust collectors.

HEALTH & SAFETY INITIATIVES

ATEX CERTIFIED TOOLS

ATEX (ATmosphères EXplosibles) is a directive outlining a number of technical and quality objectives that must be complied with to the satisfaction of a third party certification association.

Directive 99/92/EC (also known as 'ATEX 137' or the 'ATEX Workplace Directive') refers to the minimum requirements for improving the health and safety protection of workers potentially at risk from explosive atmospheres.

Directive 94/9/EC (also known as 'ATEX 95' or 'the ATEX Equipment Directive') on the approximation of the laws of Members States concerning equipment and protective systems intended for use in potentially explosive atmospheres.

The ATEX symbol is recognized internationally, providing safety assurances to users in EU states, as well as assuring users in the U.S. and other non-EU countries that the product was manufactured to high levels of safety.

REDUCED SPARKING TOOLS

In industries such as offshore, oil & gas and petrochemical, our tools will often be used to carry out tasks in potentially hazardous environments. For such circumstances, we produce spark resistant beryllium copper needles and cutter heads and aluminium bronze chisels. Beryllium copper combines high strength with non-magnetic and non sparking qualities to deliver a safe, yet efficient execution of the task at hand.

VIBRATION

As those within the industry will be aware, permanent injury can result to the hands and arms from the vibration caused by operating powered equipment. Occasional exposure is unlikely to cause ill health, however regular and frequent exposure to Hand Arm Vibration (HAVS) needs to be managed in order to protect operators.

As a quality and responsible manufacturer, health and safety issues such as these, are a significant factor in Trelawny's design considerations for each tool and machine. We have developed a particular range of reduced vibration pneumatic hand tools, under our trademark Vibro-Lo™, in order to help protect the user from injury.

Due to these safety precautions, our equipment counteracts the hazards of HAVS and stands at the forefront of the market with world leading designs of quality, efficiency and safety.

For further information on HAVS, please visit www.hse.gov.uk/vibration.

DUST CONTROL

The nature of our tools and machines is to remove surface coatings and as a consequence, this can create dust in the surrounding atmosphere. In order to combat this, we provide optional dust shrouds for all of our equipment, which when connected to vacuum dust collectors (also available from Trelawny SPT), enables the collection of dry dust and debris.

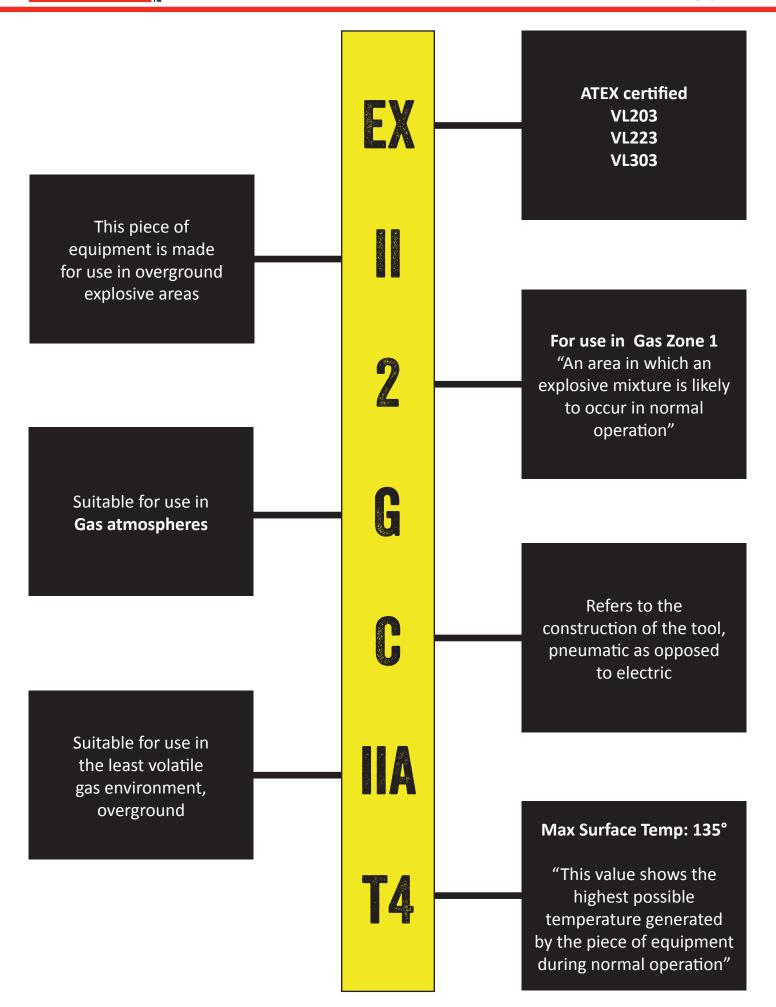

Our Tool and Vacuum System (TVS®) range of products has been designed specifically to ensure the recovery of lead based paint, radioactive contaminants and other hazardous and non-hazardous materials from the source of surface preparation equipment and hand tools, which further provides a safe and clean working environment.

IRELAWNY

SAFETY TOOLS

LOW VIBRATION NEEDLE SCALER KITS

VL EX SERIES

Trelawny's VL (Vibro-Lo ™) Needle scalers have long been the market leading tools for descaling, offering unparalleled reductions in harmful vibration, containment of hazardous dust and drop protection.

In our aim to produce the highest performing, safest tools for use in hazardous environments, we now offer ATEX certified versions of the full VL range of needle scalers.

The VL Ex series is based around our VL303 & VL203 pistol grip scalers and the VL223 in line scaler.

Trelawny's VL Ex series is the solution for corrosion management in high risk surroundings such as natural-gas installations, oil and LNG tankers, gas works, oil drilling platforms, refineries, petrochemical plants and shipyards.

Tool & Vacuum

System

ATEX

Vibration Reduced

Trelawny VL Ex ATEX Classification:

*Certified for use in Gas Zone 1

FEATURES & BENEFITS

■ Beryllium Copper needles fitted as standard – Beryllium copper provides high strength with non sparking and non magnetic properties

■ **TVS Dust shroud** fitted as standard — Ensures that operators are protected from hazardous dust present in the coating and corrosion they are removing, dust from Berrylium copper is also hazardous and we strongly recommend that the VL Ex series is used in conjunction with the KAV Ex range of dust collectors

■ **Fall arrestors** – A simple drop protection solution is fitted to all VL Ex tools eliminating the risks of dropping the tool which could cause injury, equipment damage and downtime

■ Vibro-Lo[™] vibration reduction – Our VL Ex needle scalers produce up to 8 times lower levels of harmful Hand Arm Vibration (HAV) than that of standard tools protecting operators and increasing usable working time and productivity"

LOW VIBRATION NEEDLE SCALER KITS

VL EX SERIES

ATEX KITS

Tools are supplied in a plastic case complete with:

- VL203/223/303 Low Vibration Needle Scaler
- Spare set of Beryllium Copper Needles
- Vacuum Take-Off Dust Shroud
- Fall Arrestor
- Corner Cuff
- Edge Cuff
- Flat Cuff
- Operator guide

TECHNICAL DATA

SERIES KAV PNEUMATIC VACUUM

KAV30

Tool & Vacuum System

ATEX

THE KAV30 IS ATEX APPROVED FOR GAS ZONE 1 AND DUST ZONE 21 UNDER CATEGORY 2 OF THE ATEX DIRECTIVE.

The K series range of industrial dust collectors form an integral part of Trelawny TVS® (Tool and Vacuum System).

Uniquely available with a fully conductive accessory kit, stainless steel canisters mounted on a stainless steel caddy fitted with conductive braked castors & wheels. Each machine is issued with an earth path continuity certificate and where applicable the Type H versions include a filtration test certificate.

The K series range of industrial dust collectors form an integral part of Trelawny's TVS®, Tool and Vacuum System, for our range of smaller hand held surface preparation equipment.

FEATURES & BENEFITS

- 30 litre capacity
- ATEX certified
- Optional HEPA option available
- Supplied with conductive tool kit
- Optional wet use version
- Suitable for use with Trelawny's TVS® range of handheld scaling tools

APPLICATIONS

- Collection of dust in hazardous environments categorised under category 2 of the ATEX directive
- Collection of dry dust and wet materials

Wet & Dry models complete with:

- 38mm Tool kit (Part No. 303.1085)
- 14" Antistatic Float Assembly (Part No. 303.1050/AS)
- 14" Standard filter assembly (Part No. 303.1025)
- 5 x K4 Disposable paper bags

Trelawny recommends an optimum air pressure of 6 bar for maximum efficiency

- ** ATEX Directive 99/92/EC referring to health and safety of workers that might be at risk from explosive atmospheres. Classifies hazardous areas into zones which for dust range from zone 20 (combustible dust present coninuously or for long periods); through zone 21 (combustible dust likely occasionally) to zone 22 (combustible dust not likely to occur, or for a short period).
- ** ATEX approved vacuums for use in gas zone 1 and dust zone 21 are available, please ask our sales team for details
- ** It is the end user responsibility to ensure & maintain a good earth bond at the air connection point
- ** HEPA High Efficiency Particulate Air filter for collection of hazardous dust

VL EX NEEDLE SCALER TVS PACKAGE

KAV30

ATEX

Vibration Reduced

TRELAWNY TVS HAS LONG BEEN AT THE FOREFRONT OF HAZARDOUS COATING REMOVAL. NOW WITH FULL ATEX CERTIFICATION OUR TVS NEEDLE SCALER AND DUST COLLECTION PACKAGES ARE THE SAFEST OPTIONS FOR SURFACE PREPARATION IN EX ZONES

Trelawny's EX TVS (ATEX Tool and Vacuum System) combines our TVS dust control, Vibro Lo™ vibration reduction and now ATEX for use in explosive environments in a complete descaling package.

Our tool and dust collector packages provide a safety conscious solution for removal of coatings and corrosion with full containment while working in hazardous environments.

FEATURES & BENEFITS

- Choice of 3 kits based around our VL Ex needle scalers the VL303Ex, VL203Ex or VL223Ex
- TVS Complete with KAV30 pneumatic HEPA dust collector for containment of hazardous coatings at source
- Vibro Lo[™] vibration reduction technology to extend working time and reduce operator injury
- 30 Litre collection capacity
- Simple maintenance with no special tools required for reduced downtime

required for reduced downtime

FEATURES & BENEFITS

- Available for standard and Vibro-Lo[™] ranges
- Range of dust collectors for Wet & Dry use available
- ATEX and HEPA options available

TRELAWNY TOOL & VACUUM SYSTEM (TVS®) FORMS A HIGH PERFORMANCE, SAFETY FOCUSSED SYSTEM FOR REMOVING HAZARDOUS COATINGS.

The TVS® range includes shrouded versions of all of our key surface preparation tools:

- Needle Scalers
- Scaling Hammers
- Hand Scabblers
- Peening Preparation Tool
- Floor Scabblers
- Deck Scalers

TVS® shroud kits are also retrofitable to a wide range of our tools. Please refer to individual product pages for part numbers.
